

PROPERTY OF PACIFIC EDGE IMPORTS, AGOURA HILLS, CA

## American Orange Liqueur

*Pot distilled using two types of citrus peels:  
Curacao and Bergamot.*

We steep both in spirit, the carefully distill it in our small copper pot still, separating the clean citrus aromas from the bitterness that is inherent in citrus pith. We then rest the resulting distillate in glass carboys, which softens the flavors and relaxes the mouthfeel. The finished distillate is blended with cane sugar, Belgian candy sugar, and agave to the spirit a relatively dry finish.
