

PROPERTY OF PACIFIC EDGE IMPORTS, AGOURA HILLS, CA

Navy Strength American Gin

We individually distill each botanical, creating a bold, aromatic gin. Loaded with herbaceous character and tons of bitter citrus peel.

Because it was stored next to gunpowder munitions on naval warships, Navy Strength gin was distilled to a proof just high enough that if it spilled during battle, the ship's gunpowder would still ignite. The fact that Leopold's used double the juniper with this gin is extremely apparent on the nose, which is extremely floral. Bottled at 114 Proof.
