

MOLETTO®

MOLETTO GIN

A traditional gin spirit enhanced by craft quality distillation and a creative Italian flair. From the Veneto Region, the Italian region most associated with distillation, comes an original premium gin that combines the flavors of carefully chosen juniper berries from the Alps and the Mediterranean coast. What makes this gin special and uniquely Italian is the flavor addition from the finest, ripe, Italian tomatoes!

Production

Selected mixed grains are distilled in artisanal copper stills to produce the alcohol base for this gin. Separate infusions of juniper berries, from the Alps and from the Mediterranean coast, are allowed to steep and impart their particular flavors so they can be blended together with the grain alcohol to form a traditional gin spirit base. What makes this gin completely original is the addition of tomatoes, which give the gin a natural taste and aroma that is unmistakably Italian.

Tasting

Brilliant and crystal clear.

A burst of juniper first greets you followed by sunny, ripe Italian tomatoes, then notes of rosemary, mint, basil and a hint of citrus.

Enjoy Moletto Gin alone, in any classic gin cocktail, or in a new creation of your own.
