### The Company

Crescendo is a veteran owned and operated company. It was started in 2013 by an engineer wanting to create products without artificial ingredients. We are located in Eugene, Oregon in the beautiful Pacific Northwest.

### The Products: Grain to Glass

Made in a certified organic facility with certified organic products. Our water comes from the beautiful and clean McKenzie River, straight from our snowpack. We source our spirit materials from Brazil's organic cane fields. Our amazing natural flavors come from the zest of organic fruit grown by organic farms in North and South America. We take all of these products and put them together in our own unique process to bring you something special. You can taste the REAL fruit and quality with each sip.

### How to use

Our liqueur flavors are universal flavors. They can be used in almost any drink or food type. Use with any items that call for those flavors as you would any other liqueur. Or you can enjoy them ice cold in an aperitif glass. They taste sweet but the sugar content is as low as it can be. The Vodka is a universal spirit. Use in any recipes.
